About Me:

I am a B.Tech CSE (IoT) student with hands-on experience in web development and IoT-based projects. I have developed solutions such as a lost-and-found portal and a water quality monitoring system. I am passionate about solving real-world problems using technology and continuously improving my development skills. Currently seeking opportunities to gain practical industry experience and contribute to impactful projects.

Internship:

Web Development Intern – Kistechno Software Pvt. Ltd.

- Built responsive web pages using HTML, CSS, and JavaScript, improving user experience across devices.
 - Improved UI consistency across multiple browsers to enhance user experience
 - Collaborated with team members to deliver features on time in a real-world development environment.
-

Projects:

1) Tracemate – Lost & Found Web Portal:

- Developed a full-stack lost and found portal using HTML, CSS, JavaScript, PHP, and MySQL.
- Implemented authentication, item tracking, and search filters to improve usability.
- Reduced manual effort in item recovery by providing a centralized system.

2) Water Quality Checker – IoT Monitoring System:

- Designing an IoT-based system using sensors to monitor pH, turbidity, and temperature in real time.
 - Integrated microcontroller-based data collection for environmental monitoring.
 - Aims to provide accurate and efficient water safety analysis.
-

Skills:

Technical Skills:

- Programming: C, Java
- Web: HTML, CSS, JavaScript, PHP
- Database: MySQL
- IoT: Sensors, Microcontrollers
